Work Experience

X-Meta Exchange - Full Stack Developer

AUGUST 2022 - PRESENT

As a Full Stack Developer at X-Meta Crypto Currency Exchange, I develop the website and backend server using Node.js on the AWS Serverless Framework. Collaborating with cross-functional teams, I ensure seamless integration for a reliable and user-friendly cryptocurrency trading platform. I write clean code, leveraging HTML, CSS, and JavaScript for an intuitive interface. Working within the AWS Serverless Framework, I use services like AWS Lambda, API Gateway, and DynamoDB for scalability. I collaborate with engineers, designers, and product managers to implement innovative solutions. Continuously improving functionality, performance, and security, I stay updated with industry trends and best practices. Together with the team, I drive the success of X-Meta Crypto Currency Exchange.

Faro Technology Solution - Developer

AUGUST 2021 - JULY 2022

I work with a small team of developers and UI UX designers. We as a team develop cross platform mobile app "Hippocards" as well as the complex system to control its' content, analyze and manage all the data relating to the app. My role is to write modern, performant, and robust code for a diverse array of client and internal projects. I communicate and collabrate with multi-disciplinary teams of engineers, desginers, clients.

Faro Technology Solution - INTERN

INTERNSHIP | MARCH 2021 - JULY 2021

Selected from 500+ applicants, the Hippocards Internship boosted my coding career. Worked with senior developers, product managers, and experts to enhance skills as a back-end developer. Built micro projects, collaborated on a production-ready web app for school management. Modeled schemas, wrote code, documented research.
